🎓 Education

University of Southern California 🔗 <i>Master of Science in Computer Science</i>	08/2025 – Present Los Angeles, Ca
Dr. Vishwanath Karad MIT World Peace University 🔗 <i>Bachelor of Technology (Computer Science and Engineering)</i> CGPA: 9.56/10	07/2019 – 05/2023 Pune, India

💼 Professional Experience

Capgemini Technology Services India <i>Analyst</i> - Developed a real-time data ingestion platform (Python/Angular) processing >100,000 data points/min for dynamic business analytics. - Implemented predictive models (Scikit-learn/TensorFlow) reducing data processing time by 40% and yielded key business insights. - Designed interactive dashboards (amCharts) increasing data visibility by 60% and improved data handling efficiency by 35%.	12/2024 – 07/2025 Mumbai, India
Asha Electronics <i>IoT Application Developer Intern</i> - Led full-stack IoT application development (Angular/Node.js), enabling real-time monitoring of over 500 sensors with <1 second data retrieval latency. - Architected a data management system for offline functionality, ensuring 100% data integrity across synchronization. - Integrated Firebase to support >500 active users and improve application load time by 25%.	07/2023 – 06/2024 Pune, India

📄 Patents and Publications

Engaging Attackers with a Highly Interactive Honeypot System Using ChatGPT 🔗 <i>IEEE-Xplore, ICCUBE-23</i>	01/22/2024
A Crypto Wallet for Farmers 🔗 <i>Indian Patent Office</i>	08/16/2024

📁 Projects

Internship Management Portal 🔗 - Automated processing of university internship data using React and Python, reducing administrative workload by eliminating manual evaluation steps. - Streamlined assignment of students to faculty and supervisors through an intuitive portal.	08/2022
Solar Power Plant Maintenance Prediction - Developed predictive models using Random Forest, LGBM, and Linear Regression to accurately forecast maintenance needs. - Identified key environmental impact factors, such as dust and bird droppings, to improve efficiency.	01/2022

🧠 Skills

Programming Languages
Python, C++, Java, JavaScript, TypeScript

Frameworks & Libraries:
Angular, React, Node.js

Databases
Firebase, SQL

Tools & Platforms
Linux, Git, Docker
